## **Introduction**

Before you read this manual you should read the Target Baccarat manual and learn how to use this strategy.

Target Baccarat is strictly for the game of baccarat. Master it and you can easily win \$50,000 in the next two days!

## Bankroll and Bets

The base bets, Game Bankroll, Total Bankroll and Betting Series for Target Baccarat are shown in Table 1. You may use this table when you play baccarat in either land-based or online play.

**Table 1. Target Baccarat Base Bets, Game Bankroll and Hourly Win Rates**

Base Bet	Bankroll	Land-based Play (120 Rounds per Hour)	Online Play (360 Rounds per Hour)
<b>\$.25</b>	\$25	NA	\$35.27
<b>\$.50</b>	\$50	NA	\$70.53
<b>\$1</b>	\$100	NA	\$141.05

### Speed of Play:

Land-based Play = 120 rounds per hour

Online Play: 360 rounds per hour

Table 1 shows the win rates for base bets ranging from 25 cents to \$1000. Hourly win rates are shown for play at the rate of 120 rounds per hour for land-based play and 360 rounds per hour for online play. If you play in a land-based game of baccarat you can use

the 120 rounds per hour win rates as approximate win rates for your play. If you play online then 360 rounds per hour is more accurate for predicting your hourly win rates.

With the information in Table 1 we can start developing your options for winning \$50,000 using Target Baccarat.

## Winning \$50,000 in Land-Based Play

Can you use an extra \$50,000? Of course you can. Other than a handful of billionaires, anyone can use another \$50,000.

In this chapter you're going to learn how to win \$50,000 one step at a time using Target Baccarat in land-based games.

Table 2 summarizes the steps you will go through to win \$100,000.

**Table 2. Winning \$50,000 In Land-based Play**

Starting Bankroll	Base Bet	Hourly Win Rate	Win Goal	Time to Reach Goal (In Hours)	Ending Bankroll
\$500	\$5	\$235.08	\$500	2.13	\$1000
\$1000	\$10	\$470.16	\$500	1.06	\$1500
\$1500	\$15	\$705.24	\$500	0.71	\$2000
\$2000	\$20	\$940.32	\$500	0.53	\$2500
\$2500	\$25	\$1175.40	\$1000	0.85	\$3500
\$3500	\$35	\$1645.56	\$1500	0.91	\$5,000
\$5000	\$50	\$2350.80	\$2500	1.06	\$7,500
\$7500	\$75	\$3526.20	\$2500	0.71	\$10,000
\$10000	\$100	\$4701.60	\$40,000	8.50	\$50,000
				16.46 Hours Rounded (17 Hours)	

This table is set up as follows:

**Starting Bankroll** – This is the recommended amount of bankroll for each level of play.

**Base Bet** – This is your level of play. Base bets shown in this table range from \$5 to \$100.

**Hourly Win Rate** – The documented net hourly win rate for land-based play for that level of play.

**Win Goal** – The amount you need to win to accomplish your objective at each level of play.

**Time to Reach Goal**– The length of time required to win the amount of the Target Win for each level of play.

**Ending Bankroll** – The bankroll level you need to reach at each level of play before moving up to the next higher level.

If you follow our plan it will take you about 17 hours of play to win \$50,000. If you want to win another \$50,000 you can do so in less than 11 more hours making \$100 bets.

In fact, once you complete this plan, you can win \$50,000 every 11 hours you play as long as you like.

Ready? Let's get started.

You will start out as a \$5 bettor with a bankroll of \$500. We are starting out with just the amount needed for the Game Bankroll as that is all you will need for your Total Bankroll!

Your first goal is to win the amount of the Total Bankroll needed for \$10 base bets, or \$1000. As a \$5 bettor you'll win \$235 an hour, so that it will take you about two hours to win enough to move up from \$5 betting to \$10 betting. This is shown in the first row of Table 2.

After reaching your first goal of building your bankroll up to \$1,000 you will continue to play and move up the size of your play as your bankroll grows.

As recapped in Table 2, you will play 1.06 hours as a \$10 bettor before jumping up to making \$15 bets.

You'll spend 0.71 hours making \$15 bets before moving up to making \$20 bets.

A little more than half an hour making \$20 bets will build your bankroll up enough to make \$25 bets.

You'll spend 0.85 hours making \$25 bets on your way to becoming a \$35 bettor.

You'll play less than an hour making \$35 bets before moving up to making \$50 bets.

As a \$50 bettor it will take you just 1.06 hours of play to win enough to start making \$75 bets.

As a \$75 bettor your goal will be to hit \$10,000. It will take you just 0.71 hours play at this level to reach \$10,000 in winnings.

You will now be able to make \$100 bets. It will take you just 8.5 hours to win \$40,000 more and bring your bankroll up to \$50,000.

It will have taken you just 17 hours of play to turn \$500 into \$50,000 playing in a land-based casino.

If you decide stay at the \$100 betting level, winning \$4,701 an hour, another 10.6 hours of play will bring you another \$50,000 in winnings.

As a \$100 bettor you will easily be able to win \$50,000 a week playing a couple of times a week in your favorite casino!

## Winning \$50,000 Online

In this chapter you're going to learn how to win \$50,000 one step at a time using Baccarat's Target Baccarat in a land-based casino.

Table 3 summarizes the steps you will go through to win \$50,000

**Table 3. Winning \$100,000 Online**

Starting Bankroll	Base Bet	Hourly Win Rate	Win Goal	Time to Reach Goal (In Hours)	Ending Bankroll
\$25	\$.25	\$35	\$25	0.71	\$50
\$50	\$.50	\$70	\$50	0.71	\$100
\$100	\$1	\$141	\$100	0.71	\$200
\$200	\$2	\$282	\$100	0.35	\$300
\$300	\$3	\$423	\$200	0.53	\$500
\$500	\$5	\$705	\$500	0.71	\$1000
\$1000	\$10	\$1410	\$500	0.35	\$1500
\$1500	\$15	\$2115	\$500	0.23	\$2000
\$2000	\$20	\$2821	\$500	0.18	\$2500
\$2500	\$25	\$3526	\$47,500	13.47	\$50,000
				17.95 Hours Rounded (18 Hours)	

This table is set up as follows:

**Starting Bankroll** – This is the recommended amount of bankroll for each level of play.

**Base Bet** – This is your level of play. Base bets shown in this table range from \$5 to \$100.

**Hourly Win Rate** – The documented net hourly win rate for land-based play for that level of play.

**Win Goal** – The amount you need to win to accomplish your objective at each level of play.

**Time to Reach Goal**– The length of time required to win the amount of the Target Win for each level of play.

**Ending Bankroll** – The bankroll level you need to reach at each level of play before moving up to the next higher level.

If you follow our plan it will take you about 18 hours of play to win \$50,000. If you want to win another \$50,000 you can do so every 10 ½ hours of play.

In fact, once you complete this plan, you can win \$50,000 every 13 1/2 hours you play as long as you like.

Ready? Let's get started.

You will start out as a 25-cent bettor with a bankroll of \$125. If you play in a casino offering a 100% sign up bonus you can get started with just half this amount or \$62.50 and use the casino bonus to reach the level of \$125.

Your first goal is to win the amount of the Total Bankroll needed for 50-cent base bets, or \$125. As a 50-cent bettor you'll win \$486 an hour, so that it will take you about .51 hours (31 minutes) to win enough to move up from \$50-cent betting to \$1 betting. This is shown in the first row of Table 3.

As recapped in Table 3, you will play 0.51 hours as a \$1 bettor before jumping up to making \$2 bets.

You'll spend 0.34 hours making \$3 bets before moving up to making \$5 bets.

Less than one hour of making \$5 bets will build your bankroll up enough to make \$10 bets.

You'll spend about 10 hours making \$10 bets on your way to winning \$95,000 and bringing your total win up to \$100,000.

## Rules to Help You Keep Your Winnings

There is no question that if you follow the Target Baccarat Strategy you will generate wins. I have even given you the average wins per hour achieved in actual play. Does this mean you can relax? Unfortunately no. While there is no question that you will win using this system of play, there is still the issue of leaving the casino with your profits in hand.

One of our most important rules to help you leave a winner is the 90% Rule. This rule says very simply that if you are close to hitting a target profit or a daily profit, that sometimes 90% or so is close enough.

Martin Silverthorne is a very experienced craps player. His experience is a good example of how important the 90% rule can be:

I recall very well an acquaintance of mine who had a monster roll at a craps table. When I walked up to the table, Joe was rolling the dice and playing with \$500 chips scattered all over the layout. By the time he sevens out, he was up over \$48,000. This is not bad considering he bought in less than an hour earlier for a grand. I strongly urged him to come with me and take a break. I reminded him how badly he needed this score and how good he would feel walking out with his winnings intact. He nodded and smiled and then gave some lame excuse about wanting to bet with just a couple more shooters.

I had more than made my nut for that day. In fact, catching the last ten minutes of his hot craps roll had put me way ahead. I decided to take a break in the coffee shop and try some of the coconut cream pie which was reputed to be the best in town.

I ran into another friend and talked for over an hour. When I came back out, Joe was still at the same table. I walked up and noticed his pitiful little pile of

green chips. Joe gave me a lame look and continued to play. I saw him the next day and asked him how he ended up. "Tapped out," were his words. "You didn't drop the whole 50 grand did you?" I asked.

"It was only 48 thousand," he responded. "The reason I kept playing is because I wanted to hit 50 thousand."

As I walked away, I wondered to myself what in the hell is the difference between 48 thousand and 50 thousand when you are that much ahead?

I think 48 thousand should have been close enough, don't you?

Any time you are struggling to hit a target profit, are playing on a short time schedule or just start to hear that little nagging voice somewhere in the back of your skull telling you to watch out, you can remember Joe. He should have known that 48 grand was close enough. Don't ever get hung up on exact amounts. If you are trying to win \$50 and hit \$48, you can call it close enough and take a break. Remember that you will never go broke by taking a break early and walking off with your profits intact.

Whenever you are somewhere near your target profit for a game, you will want to think about quitting. Obviously you can just call the game over and quit. If you decide to quit playing, remember that you can always quit right after hitting any Strike Win.

## Living a Life of Ease

When you go to the casino, you need to remember that your one purpose is to win. You can drink, party, visit, flirt and relax on your own time after you have locked up your daily win. After becoming a proficient craps player and increasing the size of your minimum wagers, you will be able to travel a good part of the year, courtesy of your favorite casinos. This may become an important part of your retirement plan. You can use your new skills at craps to pay for your vacations and pocket a good deal of change as well.

You may consider becoming a full time pro. Before you make this step, I want you to think about it very carefully. Whereas playing several times a month and winning can bring you a great deal of pleasure, having to play every day to make your daily nut is very difficult.

Casinos can be glamorous and exciting if you don't have to be in one every day. On a daily basis, I can think of many things I had rather do than go through the repetitive grind of play needed to hit my daily win goal. Everyone is different. If you think you would like to turn pro, I suggest you take a two week vacation and spend at least ten of the days in a casino playing craps four hours a day. If, after two weeks of this, you are still game for more, then maybe you have what it takes to become a full time player.

I hope you find the *Target Baccarat Strategy* to be a lifetime source of income and satisfaction. I would like to hear about your experiences. You may write me in care of the publisher. I wish you the best in all of your life endeavors.
